

Happy Earth Day!

It may not feel like spring, but we are working behind the scenes to get our Thyme with God garden up and running for the 2021 season.

The tomato seedlings are getting bigger inside and the asparagus is just poking through outside in the garden. We are also looking to grow spring greens, such as spinach, peas, kale and lettuce, our famous garlic, peppers, potatoes and of course our tomatoes. Hopefully, we will have a better year for our rhubarb, raspberries, and apples. We also grow many flowers to encourage the pollinators to visit often.

The garden team meets on Mondays just in time to harvest what is ready and delivery the produce to the Centre Wellington Food Bank on Tuesdays.

This year, we have a few projects on the list such as repairing the walkway to make it more accessible, improve the grass with overseeding and to mulch the flower gardens around the perimeter of the garden.

We appreciate all donations either of time or monetary offerings. If you would like to join the team for some conversation and a bit of weeding, please reach out. We would also appreciate donations towards our walkway project or gift cards to Little Tree Garden Market, or Canadian Tire for seedlings, fertilizer, grass seed and mulch.

Thank you and perhaps we will meet you in the garden - Happy Spring!

Signed, the Garden Team
